

## **ICR GROUP PUBLICATIONS**

*The books written and published by the ICR Group have a sweeping, holistic vision of Homoeopathy and its role in health, disease and the restoration of health. The books also embody the vision of tri-co-ordinate Care - the vision that only the clinician who cares can cure, only the clinician who continues to upgrade his knowledge of the field, who teaches what he knows, who goes on conducting research in the various aspects of Homoeopathic practice as well as education - only that physician can truly heal the suffering human being before him.*

*The books have been written mostly by the late Dr. M. L. Dhawale.*

*Dr. M. L. Dhawale, the doyen of Homoeopathy, was a clinician par excellence, and a noted medical educationist. He was a pathfinder in Homoeopathic Philosophy, Practice and Education, an inseparable trinity, as all discover gradually.*

*He was also a poet-philosopher who evolved through a sensitive interaction with the patients and their 'life spaces' and the need to guide them in their manner of living.*

*Not only did Dr. Dhawale make seminal contributions to the field of scientific Homoeopathy, but he also made some fundamental contributions to our understanding of the human psyche and of life in general. His study of the psychoanalytic literature as well as his grasp over the Field Theory of Dr. Kurt Lewin contributed greatly to his comprehension and presentation of human dynamics. He also brought to bear the Universal philosophy as propounded in the Bhagvad Gita, as he perceived that a healthy life can be built on this basis, even in the turbulent times of today.*

*His students, who comprise the senior faculty of the ICR Group of Organizations, and their students, have carried on his torch to the best of their abilities. As is evidenced in the last book - Paediatrics in Homoeopathy.*

*We write inside about the publications in detail.*

## THE I. C. R. OPERATIONAL MANUAL

*What does the Manual bring to the  
Homoeopathic Physician?*

The ICR Operational Manual gives a step-by-step approach to mastering the entire process of Case Receiving, Processing and the Follow up. Moreover, it also guides the learner in how to learn from the clinical material that he encounters in his own practice. A number of new sections have been added so that purpose and use of each page of the S.C.R can be understood. The language has been simplified for a beginner to understand it easily. The detailed case illustrations demonstrate the use of each page and each form in practice.

Its presentation is based on the Standardized Case Record (S.C.R.) Approach, which is a major contribution of the late Dr. M. L. Dhawale & the I.C.R. towards improving the standards of Homoeopathic Practice, Education & Research. Standardization of operations disciplines the mind and protects the physician against errors while taking quick decisions in busy practice. Authentic & adequate records are a must for legitimacy of any Research project.

The book is full of illustrations so that the reader can start experimenting with the approach right away.

The book is very important to:

- ◆ Homoeopathic doctors
- ◆ Internees and students of Homoeopathic Colleges
